FOREWORD

The material in this chapter is written with regard to typical North American Railroad Timber Trestles and other timber structures mentioned herein with:

Therefore, as an ongoing concern, the recommendations printed herein are updated in response to changes in the operating environment, changes in the designations and availability of material and material systems, advances in design and maintenance practices, and advances in the state of knowledge overall. These recommendations have been developed and are intended for routine use and might not provide sufficient criteria for infrequently encountered conditions. Professional judgement must be exercised when applying the recommendations of this chapter as part of an overall solution to any particular problem.

In general, this chapter is revised and printed anew on a calendar-year basis. The latest printed revision of the chapter should be used, regardless of the age of an existing structure. For purposes of determining historical recommendations under which an existing structure may have been built and maintained, it can prove useful to examine previous printed editions of the chapter. However, when historical recommendations differ from the
