are enmeshed in context means our capacity to act freely dissolves in the mesh We evolved capacities for consciousness and awareness capacities that allow us to realise that we are here now but that do not inevitably imply choice Our capacity for realisation gives us the ability to elicit an emotional response When we understand our enmeshment we can attune to a deep compassion for ourselves and indeed for all systems unfolding through time Compassionate attunement allows a different set of options for action to become available to us This then shifts how we respond to ourselves our human relationships and to the ecological emergency we are currently embroiled in This work is inspired by the great Kamakura Zen Master Eihei D gen The book s contribution is to extend and link the notion of practice realisation with the literature on evolutionary biology and entropy maximisation which allows us to speak of the good of systems Systems unfold as good for us when biodiversity maximisation occurs By considering the ecological emergency in light of compassionate attunement we open ourselves to a new array of possibilities for action Some of these the author outlines in the conclusion relating them to existing literature on compassionate achievement and compassionate communication to show how our this practice shifts our relationship to ourselves to one another and to the ecological emergency thus changing the course of human history
