Getting Acquainted

Congratulations upon your selection of this CASIO watch. To get the most out of your purchase, be sure to read this manual carefully.

Keep the watch exposed to bright light

Bright Light

The electricity generated by the solar cell of the watch is stored by a built-in battery. Leaving or using the watch where it is not exposed to light causes the battery to run down. Make sure the watch is exposed to light as much as possible.

- When you are not wearing the watch on your wrist, position the face so it is pointed at a source of bright light.
- The amount of light that reaches the watch depends on your viewing angle as much as possible. Charging is reduced significantly if the face is only partially covered.

- This watch continues to operate, even when it is not exposed to light. Leaving the watch in the dark can cause the battery to run down which will result in some watch functions to be disabled. If the battery goes dead, you will have to re-configure watch settings after recharging. To ensure normal watch operation, be sure to keep it exposed to light as much as possible.

Battery charges in the light.

Battery discharges in the dark.

General Guide

- Press **(D)** to change from mode to mode.
- In any mode when a setting screen is on the display, press **(D)** to terminate the flow of the watch.

Timekeeping Mode

Battery Level Indicator

World Time Mode

- The actual level at which some functions are disabled depends on the watch mode.
- Frequent display illumination can run down the battery quickly and require recharging. The following guidelines give an idea of the charging time required to recover from a single illumination operation.
 - Approximately 10 minutes exposure to bright sunlight (coming in through a window).
 - Approximately 30 minutes exposure to indoor fluorescent lighting.
- Be sure to read "Power Supply" for important information you need to know about exposure to bright light.

If the display of the watch is blank, it means that the watch's Power Saving function has turned off the display to conserve power.

- See "Power Saving Function" for more information.

About This Manual

- Depending on the model of your watch, display text appears either as dark figures on a light background, or light figures on a dark background. All sample displays in this manual are shown using dark figures on a light background.
- Button operations are indicated using the letters shown in the illustrations.
- Most of the Display examples in this manual show only the digital display, without the analog hands.
- Each section of this manual provides you with the information you need to perform operations in each mode. Further details and technical information can be found in the "Reference" section.

Radio-controlled Atomic Timekeeping

This watch receives a time calibration signal and updates its time setting accordingly.

- Supported time calibration signals: Germany (Mainfringen), England (Weybridge), United States (Fort Collins, Japan).

Current Time Setting

This watch adjusts its time setting automatically in accordance with a time calibration signal. You can also perform a manual procedure to set the time and date, when necessary.

- The first thing you should do after purchasing this watch is to specify your Home City (the city where you normally will use the watch). For more information, see "To specify your Home City."

- When using the watch outside the areas covered by the time signal transmitters, you will have to adjust the current time setting manually as required. See "Timekeeping" for more information about manual settings.
- The U.S. time calibration signal can be picked up by the watch while in North America. The term "North America" in this manual refers to the area that consists of Canada, the continental United States, and Mexico.
- The analog time of this watch is synchronized with the digital time. Because of this, the analog time setting is automatically adjusted whenever you change the digital setting. See "Adjusting Timekeeping" for more information.

To specify your Home City

1. In the Timekeeping Mode, hold down **(D)** the city code starts to flash. This is the setting screen.
2. Press **(D)** to select the city code you want to use as your Home City.
 - Time calibration signal reception is supported when any one of the city codes shown in the table below is selected as your Home City.

Important!

- Normally, your watch should show the correct time as soon as you select your Home City code. If it does not, it should adjust automatically after the next auto receive operation in the middle of the night. You can also perform manual receive if you can set the time manually.
- This watch will receive the time calibration signal automatically from the appropriate transmitter in the middle of the night and update its settings accordingly. For information about the relationship between city codes and transmitters, see "Home City Codes and Transmitters".
- Under factory default settings, auto receive is turned off for all of the following city codes: BCRS (Beijing), HKG (Hong Kong), SAE (Singapore), SRS (Seoul), and AAC (Amsterdam). For details about turning auto receive for these city codes, see "To turn auto receive on and off".
- You can disable time signal reception, if you want. See "To turn auto receive on and off" for more information.
- See the page under "Reception Ranges" for information about the reception ranges of the watch.
- If you are in an area that does not use Daylight Saving Time (summer time), turn off the DST setting.

Time Calibration Signal Reception

- There are two different methods you can use to receive the time calibration signal: auto receive and manual receive.
- **Auto Receive**
With auto receive, the watch receives the time calibration signal automatically up to within a day. When an auto receive is successful, the remaining auto receive operations are not performed. For more information, see "About Auto Receive".
 - **Manual Receive**
Manual receive lets you start a time calibration receive operation with the press of a button. For more information, see "To perform manual receive".

Important!

- When getting ready to receive the time calibration signal, position the watch as shown in the nearby illustration, with its LCD crystal side facing towards a window. Make sure there are no metal objects nearby.

- Make sure the watch is facing the right way.
