Predicting Student Success on the Texas Chemistry STAAR Test William L. Johnson, Annabel M. Johnson, Jared Johnson, 2012 Background The context is the new Texas STAAR end of course testing program Purpose The authors developed a logistic regression model to predict who would pass or fail the new Texas chemistry STAAR end of course exam Setting Robert E Lee High School 5A with an enrollment of 2700 students Tyler Texas Date of the study was the 2011 2012 academic year Study Sample A sample of n 100 students from the author s chemistry classes 32 high school sophomores and 68 high school juniors Intervention Developed a binary logistic regression prediction model no control group applicable Research Design Statistical Modeling Control or Comparison Condition Control or comparison group not applicable for the study Data Collection and Analysis The students n 100 STAAR test scores from the new Texas end of course chemistry pilot test were analyzed in the 2011 2012 school year Variables included in the logistic regression model were as follows Students previous years science TAKS test scores raw data science TAKS scores and STAAR end of course scores coded pass 1 or fail 0 as categorical variables and students grade level coded sophomore 0 or junior 1 as categorical variables Findings A binary logistic regression analysis was performed using the new Texas end of course pilot chemistry STAAR test scores as the dependent variable DV and the previous year s science TAKS scores and grade level as predictor variables A total of n 100 cases were analyzed and the full model was significantly reliable chi square 102 568 df 2 p less than 0 000 This model accounted for between 64 1% and 85 9% of the variance in STAAR status with 92 9% of the students passing the STAAR test successfully predicted and 93 2% of students failing the STAAR test successfully predicted Overall 93 0% of the predictions were correct The Wald statistic showed that the TAKS raw score reliably predicted passing or failing the STAAR end of course chemistry test Conclusion The binary logistic regression model was significantly reliable chi square 102 568 df 2 p less than 0 000 Overall 93% of the predictions were correct The model had a very high predictive outcome Logistic Regression Variables are appended to this document *STAAR EOC Chemistry Assessment Secrets Study Guide* Mometrix Media LLC, 2016-10-24 Includes Practice Test Questions STAAR EOC Chemistry Assessment Secrets helps you ace the State of Texas Assessments of Academic Readiness without weeks and months of endless studying Our comprehensive STAAR EOC Chemistry Assessment Secrets study guide is written by our exam experts who painstakingly researched every topic and concept that you need to know to ace your test Our original research reveals specific weaknesses that you can exploit to increase your exam score more than you ve ever imagined STAAR EOC Chemistry Assessment Secrets includes The 5 Secret Keys to STAAR Success Time is Your Greatest Enemy Guessing is Not Guesswork Practice Smarter Not Harder Prepare Don t Procrastinate Test Yourself A comprehensive General Strategy review including Make Predictions Answer the Question Benchmark Valid Information Avoid Fact Traps Milk the Question The Trap of Familiarity Eliminate Answers Tough Questions Brainstorm Read Carefully Face Value Prefixes Hedge Phrases Switchback Words New Information Time

Henry Braun, 2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4-8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
