

Observation Paper #2

Class/Section: FHS 1500-001

Name: Madison Memmott

Assignment: Observation 2

Background Information

Child's age: 4-Years-old

Child's name: "Brady"

Location: Mother's Helper Daycare center, South Jordan UT off of 104th South.

Description: This child is at the Daycare center playing with other kids and the adults that work there while his parents are busy working or doing something that they need their child supervised while they do it.

Biological Development

While observing "Brady" at Mother's Helper in South Jordan Utah I realized that he was a VERY mobile kid, "Children take every opportunity to exercise their bodies..." (Berger, 2016 p.164), who seemed very stable on his feet "Many 2-year-olds fall down and bump clumsily into each other. By contrast, some 5-year-olds are skilled and graceful." (Berger, 2016 p.164) I wouldn't say he was graceful, he was a little wobbly, yet I never saw him fall down after running or anything like that. He seems to be on track when it comes to this part of his development.

"Brady" seemed to be about the same size as the other boys his age, this is most likely because his parents have provided him with a "safe place to play, with ample time, appropriate equipment and active playmates." (Berger, 2016 p.163) When they are provided this they have room to grow and develop not only mentally but physically as well.

His size isn't only based on a safe and appropriate environment at home and in his daycare, it also is about nutrition, "Children are sometimes malnourished, even in nations with abundant food. The main reason is that small appetites are often satiated by unhealthy foods, crowding out needed vitamins." (Berger, 2016 p.164) "Brady" seemed to be well nourished and openly welcomed the snack that the Daycare provided him.

Cognitive Development

Four-year-old "Brady" was a very talkative child, most of his talking with adults consisted of him asking "Why?" to almost everything he was asked to do, "4 years: 3,000-10,000 words... Questions: Peak of "Why?" questions, many "How?" and "When?" questions." (Berger, 2016 p.182). When listening to him talk his sentences seemed very broken up and incomplete this could be because his parents may talk to him like that. "Young children are language sponges; they soak up every verbal drop they encounter, mastering vocabulary and grammar at a

Child Development Observation Paper

Scott Dowling, Arnold Rothstein

Child Development Observation Paper:

Developments in Infant Observation Susan Reid, 1997 First Published in 1997 Routledge is an imprint of Taylor Francis an informa company Advances in Clinical Child Psychology Benjamin Lahey, 2013-03-09 *Advances in Clinical Child Psychology* is a serial publication designed to bring together original summaries of the most important new developments in the field of clinical child psychology and its related disciplines Each chapter is written by a key figure in an innovative area of research or by an individual who is particularly well qualified to comment on a topic of major contemporary importance These chapters provide convenient concise explorations of empirical and clinical advances in the field In Volume 6 the chapters reflect the changing nature of research on the disorders of children Since the beginning of this series increasing amounts of innovative and promising research have focused on the classification etiology and development of childhood psychopathology This volume contains chapters on the classification of autism the nature of sexual abuse the development of social deficiencies and affection and the important variables of maternal depression infant child interactions sibling interactions and early temperament This volume also highlights another significant trend in clinical child psychology its increasing rapprochement with developmental psychology A chapter on the importance of cognitive development in dictating child interview strategies is an important example of this trend We appreciate the roles played by the advisory editors in suggesting excellent topics and thoughtfully editing the chapters As always our strongest thanks go to the volume's authors for their outstanding contributions *The Child and the Day Care Setting* Ricardo C. Ainslie, 1984 Social Skills Assessment and Training with Children Larry Michelson, Don P. Sugai, Randy P. Wood, Alan E. Kazdin, 2013-11-21 The purpose of this book is to provide readers with sufficient knowledge regarding social skills assessment and training with children so that they can implement and evaluate social skills programs on their own Increased interest in promoting children's social skills has stemmed in part from advances in research that have shown the importance of childhood social competency for adjustment in both childhood and adulthood There is a growing need for assessment and training methods that can be utilized by diverse groups of professionals and paraprofessionals This book is intended for mental health workers teachers educators clinicians and child care personnel The book thoroughly reviews the literature to acquaint readers with relevant findings on social skills and to provide discussion regarding contemporary issues and assessment techniques Subsequently comprehensive procedures in the training of children's social skills are presented Readers are also provided with 16 detailed training modules each of which comprises a rationale instructions Scripts and homework assignments These modules are designed to permit effective implementation of social skills training programs Moreover they provide a structured and programmatically designed format that builds in clinical flexibility for their use with individual children or groups of children These modules are followed by a clinical issues section designed to address potential obstacles to effective training Following these major sections two appendixes have been included in the book The first appendix is a step by step description of how to

conduct an assessment **Parents and Toddlers in Groups** Marie Zaphiriou Woods, Inge-Martine Pretorius, 2013-05-13

This book explores how psychoanalytic principles can be applied when working with parents and toddlers in groups. Illustrated with lively observations, it discusses how these parent toddler groups can be an effective medium for early intervention during a period which is critical for the negotiation of a child's central emotional issues. *Parents and Toddlers in Groups* demonstrates the particular challenges of the toddler phase and its contribution to an individual's future development and relationships. Focusing on an approach developed by the Anna Freud Centre and comprising chapters from a range of expert contributors, topics include the history, theory and practice of parent toddler groups at the Anna Freud Centre, how this approach has been adapted and applied across a wide range of settings and cultures, the findings of research projects carried out on parent toddler groups. This book will be a valuable resource for practitioners wanting to reach parents and young children in community, educational and a variety of other settings. It will also appeal to child psychotherapists and psychologists working in CAMHS teams.

Progress in Behavior Modification Michel Hersen, Richard M. Eisler, Peter M. Miller, 2013-10-22 *Progress in Behavior Modification* Volume 9 covers the developments in the study of behavior modification. The book discusses the future of behavior therapy, an examination of the rationale and treatment effectiveness of overcorrection and the therapeutic innovations and emerging conceptual challenges in the behavioral treatment of test anxiety. The text also describes the conceptual and empirical status of rational emotive therapy, the behavior modification procedures for training chronically institutionalized schizophrenics and the behavior modification of the elderly. The behavioral assessment and training of children's social skills are also considered. Psychologists, psychiatrists and educators will find the book invaluable.

The Oxford Handbook of the Development of Imagination Marjorie Taylor, 2013-04-02 Children are widely celebrated for their imaginations, but developmental research on this topic has often been fragmented or narrowly focused on fantasy. However, there is growing appreciation for the role that imagination plays in cognitive and emotional development, as well as its link with children's understanding of the real world. With their imaginations, children mentally transcend time, place and/or circumstance to think about what might have been, plan and anticipate the future, create fictional relationships and worlds, and consider alternatives to the actual experiences of their lives. *The Oxford Handbook of the Development of Imagination* provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought. The topics covered include fantasy, reality distinctions, pretend play, magical thinking, narrative anthropomorphism, counterfactual reasoning, mental time travel, creativity, paracosms, imaginary companions, imagination in non-human animals, the evolution of imagination, autism, dissociation and the capacity to derive real-life resilience from imaginative experiences. Many of the chapters include discussions of the educational, clinical and legal implications of the research findings, and special attention is given to suggestions for future research. *Observing*
