

Public Safety Communications Pre-Employment Test Preparation Guide

The Online TestGenius: CritiCall pre-employment test used by this agency measures underlying skills and abilities a person needs to possess prior to any training they might receive if they are hired as a public safety dispatcher and/or call taker, including the ability to effectively navigate and use a computer. Because of this, a test taker does not need to possess any specialized dispatcher/call taker knowledge or training to be able to read, understand, or answer the test items. The following information is designed to help a future test-taker prepare for the TestGenius CritiCall testing process.

General Notes

- Be sure to follow all of the instructions provided during the test.
- Practice test items are at the beginning of each section of the test to help you understand how you should respond during that section. Scores from the practice items are not included in your final test score. You are not required to take the practice items and you will be given an opportunity to bypass them during the test if you wish.
- During the test you will likely be required to listen to spoken information heard over a headset and then must use that information to answer questions or input data. You will also likely have the ability to adjust the volume of the information you hear over the headset.
 - Many test takers find it helpful to have the computer's keyboard "Num Lock" (number lock) function turned "on" when taking the test.
 - *Note: See https://en.wikipedia.org/wiki/Num_lock for details.*
- Do not be surprised when the computer allows you to enter information during many parts of the test using only UPPER case letters. This mimics computerized dispatcher systems, which also limit a dispatcher to enter information in only UPPER case letters.
- You will be penalized if you skip any questions during the test (unless you are informed otherwise during the instructions for that portion of the test.).
- You may need to use "scroll bars" that might appear on the right side of the computer screen during testing so that you can view those parts of the screen that might be hidden.
