Dependency And Development In Latin America:

Dependency and Development in Latin America Fernando Henrique Cardoso, Enzo Faletto, 2024-03-29 At the end of World War II several Latin American countries seemed to be ready for industrialization and self sustaining economic growth Instead they found that they had exchanged old forms of political and economic dependence for a new kind of dependency on the international capitalism of multinational corporations In the much acclaimed original Spanish edition *Dependencia y Desarrollo en Am rica Latina* and now in the expanded and revised English version Cardoso and Faletto offer a sophisticated analysis of the economic development of Latin America The economic dependency of Latin America stems not merely from the domination of the world market over internal national and enclave economies but also from the much more complex interaction of economic drives political structures social movements and historically conditioned alliances While heeding the unique histories of individual nations the authors discern four general stages in Latin America s economic development the early outward expansion of newly independent nations the political emergence of the middle sector the formation of internal markets in response to population growth and the new dependence on international markets In a postscript for this edition Cardoso and Faletto examine the political social and economic changes of the past ten years in light of their original hypotheses At the end of World War II several Latin American countries seemed to be ready for industrialization and self sustaining economic growth Instead they found that they had exchanged old forms of political and economic dependence for a new kind of dependence

field represents a scholarly consolidation and reassessment of the controversies concerning the development of Latin America. Beginning with a historiographic overview, the editors emphasize the origins, evolution, and historical context of the development of each theoretical school: modernization, dependency, and Marxism; corporatism and bureaucratic authoritarianism; and then present key selections drawn from the writings of major theorists, organized by school. Each selection is prefaced with a short editorial introduction that highlights the central themes. A concluding section outlines the main debates surrounding each school and suggests new directions in theoretical development that might arise from criticism of the theories of authoritarianism and the search for democratic processes of development. The book's usefulness as a text is further enhanced by selected bibliographies that contain additional readings on each development theory. Here is a single source for Latin Americanists who hope to interest and instruct their students in the rich theoretical traditions and debates in Latin American studies. This book can also be a strong core volume for courses on other developing areas.

Clientelism, Dependency and Development Julio A. Cross-Beras, 1980 *Dependent Development* Peter B.

Evans, 2018-06-05 In order to analyze Brazil's recent accumulation of capital in the light of its continued dependence, Peter Evans focuses on the relationships among multinational corporations, local private entrepreneurs, and state-owned enterprises that have developed in Brazil over the last decade. He argues that while relations among the three kinds of capital continue to be contradictory, a triple alliance has been formed that provides the social structural basis for the pattern of local industrialization that has emerged. The author begins with a review of the theories of imperialism and dependency in the third world. Placing the Brazilian experience of the last twenty years in its historical context, he traces the country's evolution from the period of classic dependence at the turn of the century to the current stage of dependent development. In conclusion, Professor Evans discusses the implications of the Brazilian model for other third world countries. Examining the nature of the triple alliance as it is manifested in such industries as pharmaceuticals, textiles, and petrochemicals, the author reveals the complex differentiation of the groups' roles in industrialization and lays bare the grounds for their collaboration and their conflict. He consequently shows how the differing interests, power, and capabilities of the three groups have combined to produce a system promoting industrialization that benefits the elite partnership but excludes the larger population from the rewards of growth.
