McMinn,Lisa Graham McMinn,2024-10-22 We live in a day of fast information fast fingers fast food fast shipping fast words fast anger and fast judgment Our fight or flight impulses keep us on high alert aided by mobile devices that vibrate each time another crisis strikes All this fastness can easily interfere with a slow intentional life grounded in God s love Christian faith has deep treasures and practices to offer us How will we live and who will we be in this highly charged era where politics economics environment and social norms are under significant duress Come explore quieter more intentional ways of being and how these might attune us to the slow work of God in order that we might love one another and the world as God does Our chapters pair a lure to move fast with an invitation to slow Becoming slow to anger is an invitation to empathy slow to judge is an invitation to humility and slow to grasp is an invitation to contentment Ultimately each of these invitations is a movement toward God *Envy and Gratitude* Melanie Klein,1959

Envy and Gratitude Melanie Klein,1962 **The Psychology of Theft and Loss** Robert Tyminski,2014-07-11 Why do we steal This question has confounded everyone from parents to judges teachers to psychologists economists to more than a few moral thinkers Stealing can be a result of deprivation of envy or of a desire for power and influence An act of theft can also bring forth someone s hidden traits paradoxically proving beneficial to their personal development Robert Tyminski explores the many dimensions of stealing and in particular how they relate to a subtle balance of loss versus gain that operates in all of us Our natural aversion to loss can lead to extreme actions as a means to acquire what we may not be able to obtain through time work or money Tyminski uses the myth of Jason Medea and the Golden Fleece to explore the dilemmas involved in such situations and demonstrate the timelessness of theft as fundamentally human The Psychology of Theft and Loss incorporates Jungian and psychoanalytic theories as well as more recent cognitive research findings to deepen our appreciation for the complexity of human motivations when it comes to stealing culminating in consideration of the idea of a

perpetually present inner thief Combining case studies Jungian theory and analysis of many different types of stealing including robbery kidnapping plagiarism and technotheft The Psychology of Theft and Loss is a fascinating study which will appeal to psychoanalysts psychologists psychiatrists social workers family therapists and students
