Revisiting Environmental and Natural Resource Questions in Sub-Saharan Africa Wilson Akpan,Philani Moyo,2017-06-23 Based on case studies in Southern Africa West Africa and East Africa this book revisits some of the dilemmas and paradoxes associated with the development management and utilisation of environmental resources as well as lacklustre official handling of climate change related challenges in Sub Saharan Africa On the subject of natural resource exploitation in particular the book revisits scholarly debates and specific practices around compensation benefit and burden sharing local participation and space place dynamics It highlights fundamental ambiguities in the ways the dominant discourses and policy responses have been framed and mobilised and examines epistemic and ideational incongruences that have hobbled and sometimes negated the effectiveness of otherwise well intentioned interventions On climate change the book revisits debates around the vulnerability assets nexus with regard to mitigation and adaptation as well as the intersection of climate information and livelihoods in agro based settings The contradictions gaps and limitations of climate change policies and strategies in different regions are re examined based on new data In the last few years the Environment and Natural Resources Working Group of the South African Sociological Association SASA has intensified efforts to go beyond the annual

SASA Congresses and the production of journal articles in making the research agendas of its members more visible to the global scholarly and policy community This book is one result of such efforts It calls for a constant questioning of orthodoxies and the promotion of ethnographically sensitive and epistemologically nuanced scholarly and policy approaches to developmental challenges in Africa especially in relation to environmental resources and environmental change

**Carbon Politics and the Failure of the Kyoto Protocol** Gerald Kutney,2014-02-03 Carbon Politics and the Failure of Kyoto charts the framework and political evolution of the Kyoto Protocol negotiations and examines the ensuing failure of the international community to adequately address climate change The focus is not on the science or consequences of climate change but on the political gamesmanship of the major players throughout the UNFCCC negotiation process More than an updated history of the subject matter this book provides a detailed study of the carbon targets which became the biggest influencing factor on the reaction of nations to Kyoto s binding agreements The book provides an in depth analysis of the leading nations motives including the US China and Germany in entering the negotiations in particular their economic interests Despite the effort to combat climate change in politics that the negotiations represent the book concludes that an agreement which requires almost 200 very different nations to agree on a single protocol is doomed to failure The book offers a novel contribution to our understanding of this failure and suggests alternative frameworks and policies to tackle what is arguably the most complex political issue of our time

**Coal and Coalbed Gas** Romeo M. Flores,2013-10-19 Bridging the gap in expertise between coal and coalbed gas subfields in which opportunities for cross training have been nonexistent Coal and Coalbed Gas sets the standard for publishing in these areas This book treats coal and coalbed gas as mutually inclusive commodities in terms of their interrelated origin accumulation composition distribution generation and development providing a balanced understanding of this energy mix Currently considered a non renewable energy resource coalbed gas or coalbed methane is a form of natural gas extracted from coal beds In recent years countries have begun to seek and exploit coal for its clean gas energy in an effort to alleviate environmental issues that come with coal use making a book on this topic particularly timely This volume takes into account processes of coalification gasification and storage and reservoir characterization and evaluation and looks at water management and environmental impacts as well Covers environmental issues in the development of coalbed gas Includes case studies field guides and data examples and analytical procedures from previous studies and investigations Accessible by a large multidisciplinary market by one of the world s foremost experts on the topic
