

## A MECHANIC'S GUIDE TO SHOP SAFETY

### FLOOR CARE

**Don't slip up!** Oil, transmission fluid and other liquids can leave mechanics at risk of falls so be sure to clean up spills immediately.

**Give work hazards the boot.** All mechanics should wear proper steel toe work boots for protection, with non-slip soles to reduce the risk of falling on the job.

**Sweep up regularly.** Dust particles from drum lathes and the residue of chemical substances can be hazardous to the health if inhaled, so be sure to sweep & clean the floors daily.

### PROTECTIVE CLOTHING

**Too Hot to Handle.** Engines and other auto parts can get very hot, so be sure to wear gloves before you handle them.

**Don't turn a blind eye to safety.** Protective safety goggles should be worn when welding grinding, or working with chemicals to prevent eye injury.

**Not just a fashion statement.** Overalls protect the body coming into contact with dangerous chemicals. Keep them on at all times.

### CHEMICAL CARE

**Don't take lunch on the job.** Try not to consume food and drink on the shop floor, as it can be at risk of being contaminated, and always eat off clean surfaces.

**Dispose of waste wisely.** Follow proper guidelines for disposing of chemical waste such as gasoline, especially if it's flammable.

**Breathe easy.** Make sure that your shop is properly ventilated in order to limit inhalation of harmful fumes.

### VEHICLE SAFETY

**Don't get a shock!** Cut the power supply to all electrical components before working on them to prevent electrocution.

**Don't lift more than you carry.** Use proper lifting techniques when handling heavy parts. Lift in pairs, and use hoists when necessary.

**Make sure the vehicle is stopped.** Ensure a car's brakes are engaged before working on it. If you are jacking a car, make sure the wheels are properly blocked first.

### SHOP ORGANIZATION

**Fire safety is crucial!** Mechanical work is full of fire hazards, so make sure that your shop has working fire extinguishers and test fire alarms regularly.

**Organize your storage properly.** Make sure all parts and tools are stored securely, especially if they are up high.

**Keep exits clear!** Make sure the path to your main entrance and the emergency exits are clear at all times, so that staff can easily evacuate in the event of a fire.
