

DISTRIBUTIVE PROPERTY

To use the distributive property we distribute what is on the outside of the parentheses to the variables and constants on the inside of the parentheses using multiplication.

$$\begin{array}{l} 4(7s + 10) \\ 4 \cdot 7s \quad 4 \cdot 10 \\ 28s + 40 \\ \Rightarrow 28s + 40 \end{array}$$

$$9(x + 10)$$

$$9x + 90$$

$$8(5m + 8n)$$

$$40m + 64n$$

$$2(s - 6t + 8)$$

$$2s - 12t + 16$$

$$4(s - 10t + 8)$$

$$4s - 40t + 32$$

Elementary Mathematics Curriculum Materials Janine T. Remillard, Ok-Kyeong Kim, 2020-03-16 The book presents comparative analyses of five elementary mathematics curriculum programs used in the U S from three different perspectives the mathematical emphasis the pedagogical approaches and how authors communicate with teachers These perspectives comprise a framework for examining what curriculum materials are comprised of what is involved in reading and interpreting them and how curriculum authors can and do support teachers in this process Although the focus of the analysis is 5 programs used at a particular point in time this framework extends beyond these specific programs and illuminates the complexity of curriculum materials and their role in teaching in general Our analysis of the mathematical emphasis considers how the mathematics content is presented in each program in terms of sequencing the nature of mathematical tasks cognitive demand and ongoing practice and the way representations are used Our analysis of the pedagogical approach examines explicit and implicit messages about how students should interact with mathematics one another the teacher and the textbook around these mathematical ideas as well as the role of the teacher In order to examine how curriculum authors support teachers we analyze how they communicate with teachers and what they communicate about including the underlying mathematics noticing student thinking and rationale for design elements The volume includes a chapter on curriculum design decisions based on interviews with curriculum authors

Dynamic Learning Spaces in Education Veena Kapur, Sudipta Ghose, 2018-08-14 This volume discusses the need for a major paradigm shift in educational practice in the current digital and globalized world. It establishes a bridge between theory and praxis and revisits the objectives of learning and its modalities within the context of a rapidly evolving global world order. This volume includes perspectives from different countries on creating a dynamic and adaptive education system that encourages creativity, leadership, flexibility, and working in virtual as well as inclusive environments. The four sections include chapters that discuss creating meaningful learning environments, preparing teachers for new-age classrooms, the digital learning space, fostering change in classrooms, and importantly, also includes cases and experiments from schools. The authors are teacher-educators, teachers, and researchers, and each chapter, while being deeply rooted in theory, is juxtaposed with informed practice, making the suggestions easy to implement in different settings. This is an important resource for researchers and practitioners associated with education systems in creating engaging, meaningful, and future-ready education practices. *Geometry* Ron Larson, 1995 [The New South Wales Weekly Notes](#), 1909
