

Scientific Inquiry Cycle: Review

35+ QUESTIONS

GRADE
08

6. What factor should be considered when designing a local science solution?
- Personalized only
 - Ignoring environmental issues
 - Local conditions
 - Random guesses
7. What should you do if encountering one part of a scientific inquiry problem is too difficult?
- Ignore the hard problem
 - Break the task into smaller parts
 - Stop the problem completely
 - Plan the solution without thinking
8. What is/are a good problem that science can help solve?
- Waste management in the community
 - Climate change
 - Resource scarcity
 - Population growth
9. How does identifying a problem help in the scientific process?
- Defines the problem more clearly
 - Prevents errors from using the data
 - Helps others understand and build on it
 - Identifies necessary steps
10. What should be done if a scientific solution is unclear?
- Modify or abandon it for safety
 - Use it anyway
 - Take it slowly
 - Ignore safety and focus on speed
11. Which is an example of a hypothesis?
- Working without any tools
 - Understanding how to finish the project
 - My guess on resources
 - Choosing materials that can be reused

Name: _____

Scientific Inquiry Cycle: Review

Science helps us understand and solve problems by developing knowledge and creating things that help us live better. Each step in the cycle is important. Using science to solve a problem or improve solutions can have a positive impact. Understanding the problem fully, including its causes and effects, is the first step in finding an effective solution.

Designing solutions becomes considering various conditions, such as budget, time, and safety concerns. Sometimes, important parts of a solution might be overlooked. However, you can improve your design by testing and evaluating it. For example, creating a model for a house that you affect its cost and ease of use. Some influences the effectiveness of the solution.

After identifying a solution, determining how it works, what conditions affected it, and any compromises that have already been made are always involved in the cycle. Communication, using digital media, and reflecting on the results of the scientific process are important steps. The process of science helps students develop skills that encourage responsible decision-making and better communication skills.

6A. Mark the best answer for each question.

1. What is the first important step when working on a local problem?
- Thinking of a solution immediately
 - Using the most expensive materials
 - Ignoring safety concerns
 - Understanding the problem fully
2. What does determining conditions in a solution help with?
- Ignoring the conditions of the solution
 - Establishing a budget and safety
 - Choosing how to solve the problem
 - Determining what the solution has to solve
3. Which is an example of a hypothesis?
- Working without any tools
 - Understanding how to finish the project
 - My guess on resources
 - Choosing materials that can be reused
4. Why is it important to communicate in science?
- To avoid any safety concerns
 - To make ideas clearer
 - To finish the project as quickly as possible
 - To avoid discussing the results

6B. Mark if the statement is True (T) or False (F).

1. A hypothesis is a statement that can be tested.

2. A hypothesis is a statement that can be tested.

3. A hypothesis is a statement that can be tested.

Answer for each question.

1. How does identifying a problem help in the scientific process?

2. Why must this be considered in designing a solution?

3. What might happen when creating a model that

4. How might science solutions be communicated?

5. Why are safety concerns important in scientific understanding?
