**An Introduction to Autodesk Inventor 2010 and AutoCAD 2010** Randy Shih, 2009-09 Most schools using Autodesk software first introduce students to the 2D features of AutoCAD and then go on to its 3D Capabilities Inventor is usually reserved for the second or third course or for a solid modeling course. However another possibility is to introduce students first to solid modeling using Inventor and then to introduce AutoCAD as a 2D product. Students learn to create solid models using Inventor and then learn how to create working drawings of their 3D models using AutoCAD. This approach provides students with a strong understanding of the process used to create models and drawing in the industry. This book contains a series of tutorial style lessons designed to introduce Autodesk Inventor AutoCAD solid modeling and parametric modeling. It uses a hands on exercise intensive approach to all the import parametric modeling techniques and concepts. The lessons guide the user from constructing basic shapes to building intelligent mechanical designs creating multi view drawings and assembly models. Introduction to Inventor AutoCAD 2010 consists of ten chapters from Parametric Modeling using Inventor 2010 and six chapters from AutoCAD 2010 Tutorial First Level 2D Fundamentals. This book is available only as a three hole punch book for use in a spiral binder. This book is used by Ohio State in their freshman engineering program.

Learning Autodesk Inventor 2010 Thomas Short, Anthony Dudek, 2010 Learning Autodesk Inventor 2010 is a multi dimensional learning tool that is designed to benefit users at all experience levels. Its process base approach will provide students with a solid foundation and valuable insight to Inventor tools options and techniques. For the engineering professional the text recreates actual workflow scenarios to produce a viable solid model part or assembly. All users will benefit from the texts practical examples and clear instructions. Each topic is presented in the logical sequence where it naturally fits in the design process of real world products.
