Automobile Engg Lab Manual:

Lab Manual, 2022-12-28 Engineering education in India in general is being revamped so as to impart the theoretical knowledge along with industrial exposure. It is our attempt when we are introducing a new Lab Manual to bridge the industry-academia gap. To enable this, we have introduced components such as skill-based laboratories and project-based learning. This will allow the learner to apply knowledge gained in previous and current semesters for gaining better understanding. What once were pure mechanical systems have now been transformed into multidisciplinary labs: IOT, HEV, FEA, CNC, 3D Printing, and Industrial electronic. Interdisciplinary knowledge is gaining importance as we are moving towards an automated world as technology advances. Keeping this in mind, the Lab Manual has been designed in a way so that the learner shall be acquainted with many interdisciplinary subjects. Automobile Engineering is one of the fastest growing sectors with lots of inventions and innovations happening. The challenges for our budding engineers would be manifold when electric vehicles are already gaining popularity and driverless cars are becoming a reality. Engineers develop new technological solutions. During the engineering design process, the responsibilities of the engineer may include defining problems, conducting and narrowing research, analyzing criteria, finding and analyzing solutions, and making decisions. The Objective of the Lab Manual in Automobile Engineering is to embed a strong foundation in Automobile Engineering fundamentals to Identify, Solve, Analyze, and design real-time engineering problems as a professional and entrepreneur for the benefit of society.
