Dynamic Process Methodology In The Social And Developmental Sciences:

Dynamic Process Methodology in the Social and Developmental Sciences Jaan Valsiner, Peter C. M. Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes

Handbook of Integrative Developmental Science Michael F. Mascolo, Thomas R. Bidell, 2020-03-20 Although integrative conceptions of development have been gaining increasing interest there have been few attempts to bring together the various threads of this emerging trend The Handbook of Integrative Developmental Science seeks ways to bring together classic and contemporary theory and research in developmental psychology with an eye toward building increasingly integrated theoretical and empirical frameworks It does so in the form of a festschrift for Kurt Fischer whose life and work have both inspired and exemplified integrative approaches to development Building upon and inspired by the comprehensive scope of Fischer's Dynamic Skill Theory this book examines what an integrated theory of psychological development might look like Bringing together the work of prominent integrative thinkers the volume begins with an examination of philosophical presuppositions of integrative approaches to development It then shows how Dynamic Skill Theory provides an example of an integrative model of development After examining the question of the nature of integrative developmental methodology the volume examines the nature of developmental change processes as well as pathways and processes in the development of psychological structures both within and between psychological domains The team of expert contributors cover a range of psychological domains including the macro and micro development of thought feeling motivation self intersubjectivity social relations personality and other integrative processes It ends with a set of prescriptions for the further elaboration of integrative developmental theory and a tribute to Kurt Fischer and his influence on

developmental psychology This book will be essential reading for graduate students and researchers of developmental psychology and human development specifically developmental science

Handbook of Child Psychology and Developmental Science, Theory and Method, 2015-03-31 The essential reference for human development theory updated and reconceptualized The Handbook of Child Psychology and Developmental Science a four volume reference is the field defining work to which all others are compared First published in 1946 and now in its Seventh Edition the Handbook has long been considered the definitive guide to the field of developmental science Volume 1 Theory and Method presents a rich mix of classic and contemporary theoretical perspectives but the dominant views throughout are marked by an emphasis on the dynamic interplay of all facets of the developmental system across the life span incorporating the range of biological cognitive emotional social cultural and ecological levels of analysis Examples of the theoretical approaches discussed in the volume include those pertinent to human evolution self regulation the development of dynamic skills and positive youth development The research methodological and applied implications of the theoretical models discussed in the volume are presented Understand the contributions of biology person and context to development within the embodied ecological system Discover the relations among individual the social world culture and history that constitute human development Examine the methods of dynamic developmental research Learn person oriented methodological approaches to assessing developmental change The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in human development psychology sociology anthropology and neuroscience
