The function keys work either by themselves or in conjunction with other keys to perform different computer functions.

On a Compaq's keyboard, you will see more keys than just the letters and numbers. The F1 through F12 keys at the top of the keyboard are known as the function keys. These keys perform different functions, either when used alone or in conjunction with other keys. The function keys combine with the Fn (Function) key to create hotkeys, which are shortcuts to different commands. Depending on the program you're using, like the Internet or Microsoft Word, the function changes.

F1

2. Probably the most common function key, F1 brings up a help menu for whatever program you're working in.

F2

3. F2 renames a selected file, so highlight the name of the file you'd like to rename and press F2. Use the hotkey combination of F2 + Ctrl + Alt to open a new Microsoft Word document. In Microsoft Excel, F2 edits the active cell.

F3

4. F3 opens a search box where you can search through email, documents, pictures, music and other files. One Microsoft Word feature is to use F3 + Shift to change your text from upper case to lower case letters. In Microsoft Excel, F3 pastes a defined name into a formula.

F4

5. F4 highlights the URL address bar when working in a browser window and copies text when working in Microsoft Word. In other programs, like Microsoft Excel, F4 repeats the last action or command.
