*Return to Volcano Town* R. Wally Johnson, Neville A. Threlfall, 2023-10-24 Wally Johnson and Neville Threlfall re-examine the explosive volcanic eruptions that in 1937 killed more than 500 people in the Rabaul area of East New Britain Papua New Guinea. They reassess this disaster in light of the prodigious amount of new scientific and disaster management work that has been undertaken there since about 1971 when strong tectonic earthquakes shook the area. Comparisons are made in particular with volcanic eruptions in 1994 and 2014 when half of Rabaul town was destroyed and then abandoned. A striking feature of historical eruptive periods at Rabaul is the near simultaneous activity at Vulcan and Tavurvur volcanoes on either side of Rabaul Harbour. Such rare twin eruptions are interpreted to be the result of a common magma reservoir beneath the harbour. This interpretation has implications for ongoing hazard and risk assessments and for volcano monitoring in the area.

These are not the trendy details that will be out of date next month but the core issues everyone needs to understand so they can make good decisions and plan projects with long-term benefits.
