Education in Brazil An International Perspective OECD,2021-06-30 The Education in Brazil An International Perspective report was developed drawing on internationally comparative data on education in Brazil in particular the extensive range of data collected by the OECD through its surveys The experiences of other countries and how they have tackled challenges similar to those now faced by Brazil along with the insights from consultations with key national experts also inform the analysis **Advanced Computing in Industrial Mathematics** Krassimir Georgiev,Michail Todorov,Ivan Georgiev,2017-10-25 This book presents recent research on Advanced Computing in Industrial Mathematics which is one of the most prominent interdisciplinary areas bringing together mathematics computer science scientific computations engineering physics chemistry medicine etc Further the book presents the major tools used in Industrial Mathematics which are based on mathematical models and the corresponding computer codes which are used to perform virtual experiments to obtain new data or to better understand previous experimental findings The book gathers the peer reviewed papers presented at the 11th Annual Meeting of the Bulgarian Section of SIAM BGSIAM from December 20 to 22 2016 in Sofia Bulgaria **Digital Games and Mathematics Learning** Tom Lowrie,Robyn Jorgensen (Zevenbergen),2015-10-05 Digital games offer enormous potential for learning and engagement in mathematics ideas and processes This volume offers multidisciplinary perspectives of educators cognitive scientists psychologists and sociologists on how digital games influence the social activities and mathematical ideas of learners gamers Contributing authors identify opportunities for broadening current understandings of how mathematical ideas are fostered and embedded within digital game environments In particular the volume advocates for new and different ways of thinking about mathematics in our digital age proposing that these mathematical ideas and numeracy practices are distinct from new literacies or multiliteracies The authors acknowledge that the promise of digital games has not always been realised fulfilled There is emerging and considerable evidence to suggest that traditional discipline boundaries restrict opportunities for mathematical learning Throughout the book what constitutes mathematics learnings and pedagogy is contested Multidisciplinary viewpoints are used to describe and understand the potential of digital games for learning mathematics and identify current tensions within the field Mathematics learning is defined as being about problem solving engagement in mathematical ideas and processes and social engagement The artefact which is the game shapes the ways in which the gamers engage with the social activity of gaming In parallel the book as a te xtual artefact will be supported by Springer s online platform allowing for video and digital communication including links to relevant websites to be used as supplementary material and establish a dynamic communication space

Advances in Ring Theory and Applications Shakir Ali,Mohammad Ashraf,Vincenzo De Filippis,Nadeem ur Rehman,2024-04-28 The book intends to be a collection of research papers on algebra and related topics most of which were presented at the international Workshop on Associative Rings and Algebras with additional structures WARA22 The purpose

of the workshop WARA22 was to present the current state of the art both in the Theory of Lie structures of associative rings and algebras and in the Theory of functional identities in rings The conference has emerged as a powerful forum offering researchers the opportunity to meet get to know each other and discuss advances in ring theory inspiring further research directions The main topics covered refer to rings with involution Lie and Jordan structures rings and algebras arising under various constructions modules bimodules and ideals in associative algebras behavior of derivations automorphisms and other kinds of additive maps in rings and algebras All the contributing authors are leading international academicians and researchers in their respective fields The papers cover a wide range of topics in ring theory group theory matrix algebra and graph theory The book will serve both the specialist looking for the latest results and the novice looking for the appropriate references to access the study and understanding of the results presented here   Mathematical Methods in Interdisciplinary Sciences Snehashish Chakraverty,2020-06-15 Brings mathematics to bear on your real world scientific problems Mathematical Methods in Interdisciplinary Sciences provides a practical and usable framework for bringing a mathematical approach to modelling real life scientific and technological problems The collection of chapters Dr Snehashish Chakraverty has provided describe in detail how to bring mathematics statistics and computational methods to the fore to solve even the most stubborn problems involving the intersection of multiple fields of study Graduate students postgraduate students researchers and professors will all benefit significantly from the author s clear approach to applied mathematics The book covers a wide range of interdisciplinary topics in which mathematics can be brought to bear on challenging problems requiring creative solutions Subjects include Structural static and vibration problems Heat conduction and diffusion problems Fluid dynamics problems The book also covers topics as diverse as soft computing and machine intelligence It concludes with examinations of various fields of application like infectious diseases autonomous car and monotone inclusion problems   *Multiple Zeta Functions, Multiple Polylogarithms And Their Special Values* Jianqiang Zhao,2016-03-07 This is the first introductory book on multiple zeta functions and multiple polylogarithms which are the generalizations of the Riemann zeta function and the classical polylogarithms respectively to the multiple variable setting It contains all the basic concepts and the important properties of these functions and their special values This book is aimed at graduate students mathematicians and physicists who are interested in this current active area of research The book will provide a detailed and comprehensive introduction to these objects their fascinating properties and interesting relations to other mathematical subjects and various generalizations such as their q analogs and their finite versions by taking partial sums modulo suitable prime powers Historical notes and exercises are provided at the end of each chapter   2nd International Students Science Congress Proceedings Mahamat Ali Amine Ouchar,Birol Dağ,İbrahim Aytekin, The aim of this study is to determine PstI polymorphism in the exon 6 region of the Pituitary specific Transcription Factor Pit 1 gene which is regarded as a candidate gene in mammals in regulating growth and development in 6 different goat breeds reared in Turkey

PstI polymorphism in Pit 1 gene 450 bp was investigated by Restriction Fragment Length Polymorphism RFLP method in a total of 217 goats including 36 Hair 18 Angora 43 Kilis 37 Honaml 46 Halep and 37 heads of Saanen breeds **Revista Matemática Iberoamericana** ,2017 **Annales de l'Institut Fourier** ,2014 **CMUC** ,2014 **Acta Arithmetica** ,2018 **Annales Scientifiques de L'École Normale Supérieure** École normale supérieure (France),2016 **The Journal of Integral Equations and Applications** ,2016 **MDR's School Directory** ,1999 **Annales scientifiques de l'École normale supérieure** Ecole normale supérieure (France),2016-03 The Haskell F.
