

Operating temperatures are controlled by the thermostat knob (see diagram) located on the cabinet top trim, visible when the refrigerator door is open. Settings may be made from 1 to Max, Max being the coldest position.

When the appliance is switched on for the first time, the thermostat should be adjusted so that after 24 hours, the average fridge temperature is no higher than +5°C.

Set the thermostat half way between the 1 and Max setting and monitor to obtain the desired temperature i. e. towards Max you will obtain a colder fridge temperature and vice versa.

The normal storage temperature of the freezer should be -18°C. Lower temperatures may be obtained by adjusting the thermostat knob towards the Max position.
