Germany since Unification K. Larres,2001-02-13 A decade after the fall of the Berlin Wall the collapse of the GDR and the end of the Cold War Germany has begun to cope with the political economic social and nationalistic challenges unification has posed to its institutions and way of life in both the western and eastern part of the once divided nation The books eleven authors all experts in their field analyse the way united Germany has tackled the many unforeseen problems and highlighted the gradually emerging short and long term patterns in Germany s slow adjustment to the new realities The country has not only become more populous and territorially bigger but also burdened with much underestimated problems particularly economic and social ones The emergence of a new economic political and perhaps military superstate as feared by many in 1990 has not materialised Instead Germany today is only just coping with the domestic and external challenges of unification The economic and social integration of the former East Germany into the Federal Republic has still not been completed and may take yet another ten to fifteen years The book is a timely and well researched effort by a team of outstanding experts to evaluate Germany s performance to date It gives the reader ample and well analysed information to comprehend the many challenges facing Germany and its European

and democratic West Germany came together to form the modern German state. However, that was technically a reunification because Germany was first unified as a nation state in 1871. That unification formed a state much larger than today's Germany, stretching from Strasbourg in the Alsace region in today's France almost 1,500 kilometers to Königsberg, now Kaliningrad in contemporary Russia on the Baltic Sea. This unified Germany was an experiment with few historical precedents. The 19th century was indeed the Age of Nationalism, but German speakers had traditionally been spread out across Europe, including the Austrian Empire, loose confederations such as the Holy Roman Empire, and many other countries. German unity was a seemingly impossible dream held by nationalists for many years, but it became a reality when Prussia, the largest state in the German Confederation, pursued a deliberate and aggressive strategy to bring as many German-speaking territories under its control. That is not to say most Germans resisted unification because even as life in an assortment of German states had some advantages, an underlying insecurity prevailed in principalities lacking overarching authority. German-speaking lands had been the sites of some of the continent's most brutal wars. Moreover, there was a growing sense of German cultural and linguistic togetherness fostered by nationalists, artists, writers, and composers. Not surprisingly, German unity in 1871 caused geopolitical ripples that reverberated for decades. Other larger European powers, such as Britain, France, and Russia, came to feel threatened by the rise of Germany. These tensions were still prevalent at the outbreak of World War I in 1914 and it became even more important in World War II. In part, this was because Germany also became an economic powerhouse, fundamentally altering the global economy. Alongside the rapid expansion of the United States, trade went through a transformation that still has ramifications today. The forces driving Germany's unification in the 19th century were similar to other trends of the era, but there were many specific and contingent factors playing out before 1871. In this respect, the unification of Germany is both an unusual and unfamiliar story.

The Unification of Germany: The History and Legacy of the German Empire's Establishment looks at the life and work of Germany's most famous politician and how Germany was unified. Along with pictures of important people, places, and events, you will learn about German unification like never before.

Economic Aspects of German Unification Paul J.J. Welfens, 2012-12-06. Paul J.J. Welfens, the editor, is pleased to present a second edition of *Economic Aspects of German Unification*, which includes new chapters and several postscripts. Almost five years after unification, output in the ex-GDR is back to its 1989 level. Due to a massive intra-German resource transfer, consumption per capita in eastern Germany has not fallen as much as output and employment, which reduced by one-fifth within three years. Given high West German transfers, which represented about 5% of West German GDP and more than 50% of East German GDP, the fall of industrial output could have been much stronger than had

politically been feasible Hence structural change necessary for productivity growth was dramatic in the ex GDR where the goods producing sector manufacturing mining energy and construction strongly changed its proportions within four years construction almost doubled and the share of investment goods production reduced by 10 percentage points between 1990 and 1994 and is now down to 21.1 % Mining lost two thirds of its share in the producing sector which itself was reduced relative to GDP The share of the services industry increased by 5 percentage points between 1991 and 1994 but with a share of 27.7% in East Germany's GDP it was still about 9 percentage points lower than in western Germany By contrast government accounted for 20.9% of GDP in eastern Germany but for only 13.2% in western Germany
