Donald Ahrens,2002-08 *Intro to Meteorology & Astronomy Teacher Guide* Michael Oard,Danny Faulkner,2016-06-01 Introduction to Meteorology and Astronomy Course Description This is the suggested course sequence that allows one core area of science to be studied per semester You can change the sequence of the semesters per the needs or interests of your student materials for each semester are independent of one another to allow flexibility Semester 1 Meteorology The Earth was created to be the dwelling place of man It is a complex world and its weather patterns affect our lives every day Whether you live near the

equator a polar region or somewhere in between knowledge of the weather is important The Weather Book will teach you why our exact distance from the sun allows life on earth how the weather on the other side of the earth affects you how clouds form and how to identify the different types what the difference is between a cold and warm front why you can often see lightning long before you can hear thunder how to build your own weather station how to survive in dangerous weather what the greenhouse effect and the ozone hole are what Noah's flood and the Ice Age have in common how weatherpersons forecast hurricanes and tornadoes how to read a weather map and what our responsibility is to the environment Learning about the weather is fun It will change the way you look at the clouds in the sky Now you'll have more of an understanding about what is going on miles above your head And when you hear a weather report on television you will understand so much more about the world around you Semester 2 Astronomy One thing we have in common with the ancients is that all of the human race has gazed at the night sky and the bright morning and wondered What's out there Our universe is so vast and awe inspiring that to learn about it is to learn about ourselves The Astronomy Book will teach you what long ago astronomers thought about other worlds solar system facts how constellations relate to astrology the history of space exploration black holes do they exist the origin and age of the moon why Mars doesn't support life the composition of stars supernova remnants and the myth of star birth asteroid legends and the extinction of the dinosaurs are there planets outside our solar system and could they be home to intelligent life what are UFOs and the age of comets and meteor showers Learning about the universe is huge fun In the almost infinite expanse above us we can examine planets galaxies and phenomena so beautiful and complex that we never outgrow a childlike wonder We see our own reflection in the moon the stars and in comet trails The more we learn the less we fear

Meteorology Today C. Donald Ahrens, 2003 METEOROLOGY TODAY has for many years been one of the most widely used and authoritative texts for the introductory meteorology course Each edition is extensively reviewed by leading researchers in the field to ensure that the text remains completely up to date and reflects today's current understanding of meteorological concepts Author Donald Ahrens has been widely praised for his ability to explain relatively complicated ideas so that even under prepared students can understand them The text's clear and inviting presentation is supplemented by numerous pedagogical features that help augment students understanding Introductory stories found at the beginning of each chapter draws students naturally into the discussion In chapter reviews then help students to consolidate their understanding as they read while four types of end of chapter exercises provide opportunities for everything from further review to in class discussion questions Graphics are carefully designed and subsequently refined so that the key ideas clearly emerge Many of the photos in the book are taken by the author and provide unmatched images of dramatic weather phenomena A unique and popular feature over this title's seven editions has been the foldout cloud chart at the back of the

book A wealth of online resources accompanies METEOROLOGY TODAY Seventh Edition allowing professors to integrate striking and illuminative interactive weather exercises into their course Many of the exercises on the BLUE SKIES CD ROM packaged FREE with each new copy of the text are tied to downloadable real time weather data offering instructors an easy way to bring the exploration of current weather events into the course discussion Bulletin of the American Meteorological Society ,1930
