Using Design Research and History to Tackle a Fundamental Problem with School Algebra Sinan Kanbir, M. A. (Ken) Clements, Nerida F. Ellerton, 2017-10-28 In this well illustrated book the authors Sinan Kanbir Ken Clements and Nerida Ellerton tackle a persistent and universal problem in school mathematics why do so many middle school and secondary school students find it difficult to learn algebra well What makes the book important are the unique features which comprise the design research approach that the authors adopted in seeking a solution to the problem The first unique feature is that the authors offer an overview of the history of school algebra Despite the fact that algebra has been an important component of secondary school mathematics for more than three centuries there has never been a comprehensive historical analysis of factors influencing the teaching and learning of that component The authors identify through historical analysis six purposes of school algebra a algebra as a body of knowledge essential to higher mathematical and scientific studies b algebra as generalized arithmetic c algebra as a prerequisite for entry to higher studies d algebra as offering a language and set of procedures for modeling real life problems e algebra as an aid to describing structural properties in elementary mathematics and f algebra as a study of variables They also raise the question whether school algebra represents a unidimensional trait Kanbir Clements and Ellerton offer an unusual hybrid theoretical framework for their intervention study by which seventh grade students significantly improved their elementary algebra knowledge and skills Their theoretical frame combined Charles Sanders Peirce s triadic signifier interpretant

signified theory which is in the realm of semiotics with Johann Friedrich Herbart's theory of apperception and Ken Clements and Gina Del Campo's theory relating to the need to expand modes of communications in mathematics classrooms so that students engage in receptive and expressive modes. Practicing classroom teachers formed part of the research team. This book appears in Springer's series on the History of Mathematics Education. Not only does it include an important analysis of the history of school algebra but it also adopts a theoretical frame which relies more on theories from the past than on contemporary theories in the field of mathematics education. The results of the well designed classroom intervention are sufficiently impressive that the study might have created and illuminated a pathway for future researchers to take. The Directory includes over 6 000 courses offered by 154 institutions or distance learning consortium members. Following an introduction that describes existing practices and delivery methods the Directory offers three indexes: Subject Index of Courses Offered by Level, Course Level Index, Geographic Index. All information was supplied by the institutions. Entries include current contact information, a description of the institution and the courses offered, grade level and admission information, tuition and fee information, enrollment periods, delivery information, equipment requirements, credit and grading information, library services and accreditation. **Current Index to Journals in Education**, 1995 **Resources in education**, 1982-05 Teaching and Learning Mathematics Linda Jensen Sheffield, Douglas E. Cruikshank, 2004-03-29 Help students make sense of mathematics. Rather than merely discussing how to improve students' ability to do mathematics, this fifth edition focuses on helping them make sense of mathematics. Based on research on the functioning of the mind as it engages in learning, the text supports teachers as they promote mathematical understanding, strengthen students' abilities to think, and help students to attain computational fluency. Features: A rich collection of ready-to-use learning activities; Fully integrated language and intent of Principles and Standards for School Mathematics (PSSM); A greater emphasis on problem solving and higher level
