Activities With Surface Area:

Fundamentals of Geobiology Andrew H. Knoll, Don E. Canfield, Kurt O. Konhauser, 2012-03-30 2012 PROSE Award Earth Science Honorable Mention For more than fifty years scientists have been concerned with the interrelationships of Earth and life Over the past decade however geobiology the name given to this interdisciplinary endeavour has emerged as an exciting and rapidly expanding field fuelled by advances in molecular phylogeny a new microbial ecology made possible by the molecular revolution increasingly sophisticated new techniques for imaging and determining chemical compositions of solids on nanometer scales the development of non traditional stable isotope analyses Earth systems science and Earth system history and accelerating exploration of other planets within and beyond our solar system Geobiology has many faces there is the microbial weathering of minerals bacterial and skeletal biomineralization the roles of autotrophic and heterotrophic metabolisms in elemental cycling the redox history in the oceans and its relationship to evolution and the origin of life itself This book is the first to set out a coherent set of principles that underpin geobiology and will act as a foundational text that will speed the dissemination of those principles The chapters have been carefully chosen to provide intellectually rich but concise summaries of key topics and each has been written by one or more of the leading scientists in that field *Fundamentals of Geobiology* is aimed at advanced undergraduates and graduates in the Earth and biological sciences and to the growing number of scientists worldwide who have an interest in this burgeoning new discipline Additional resources for this book can be found at <http://www.wiley.com/go/knoll/geobiology>

Nanomaterials and Their Interactive Behavior with Biomolecules, Cells and Tissues Yogendrakumar H. Lahir, Pramod Avti, 2020-08-04 Nanoscience is a multidisciplinary area of science which enables researchers to create tools that help in understanding the mechanisms related to the interactions between nanomaterials and biomolecules nanotechnology Nanomaterials represent nanotechnology products These products have an enormous impact on technical industries and the quality of human life Nanomaterials directly or indirectly have to interact with biosystems It is therefore essential to understand the beneficial and harmful interactions of nanomaterials with and within a biosystem especially with reference to humans This book provides primary and advanced information concerning the interactions between nanomaterials and the components of a typical biosystem to readers Chapters in the book cover in a topic based approach the many facets of nanomolecular interactions with biological molecules and systems that influence their behavior bioavailability and biocompatibility including nucleic acids cell membranes tissues enzymes and antibodies A note on the applications of nanomaterials is also presented in the conclusion of the book to illustrate the usefulness of this class of materials The contents of the book will benefit students researchers and technicians involved in the fields of biological sciences such as cell biology medicine molecular biology food technology cosmetology pharmacology biotechnology

and environmental sciences The book also provides information for the material science personnel enabling them to understand the basics of target oriented nanomaterials design for specific objectives Smart and Sustainable Planning for Cities and Regions Adriano Bisello, Daniele Vettorato, David Ludlow, Claudia Baranzelli, 2021-02-09 This open access book offers a selection of research papers and case studies presented at the 3rd international conference Smart and Sustainable Planning for Cities and Regions held in December 2019 in Bolzano Italy and explores the concept of smart and sustainable planning including top contributions from academics policy makers consultants and other professionals Innovation processes such as co design and co creation help establish collaborations that engage with stakeholders in a trustworthy and transparent environment while answering the need for new value propositions The importance of an integrated holistic approach is widely recognized to break down silos in local government in particular when aimed at achieving a better integration of climate energy planning Despite the ongoing urbanization and polarization processes new synergies between urban and rural areas emerge linking development opportunities to intrinsic cultural natural and man made landscape values The increasing availability of big real time urban data and advanced ICT facilitates frequent assessment and continuous monitoring of performances while allowing fine tuning as needed This is valid not only for individual projects but also on a wider scale In addition and circling back to the first point big urban data and ICT can be of enormous help in facilitating engagement and co creation by raising awareness and by providing insight into the local consequences of specific plans However this potential is not yet fully exploited in standard processes and procedures which can therefore lack the agility and flexibility to keep up with the pulse of the city and dynamics of society The book provides a multi disciplinary outlook based on experience to orient the reader in the giant galaxy of smart and sustainable planning support the transposition of research into practice scale up visionary approaches and design groundbreaking planning policies and tools Montana Statewide Oil and Gas and Proposed Amendment of the Powder River and Billings Resource Management Plans, 2003
