### **Advanced Methodologies and Technologies in Modern Education Delivery** Khosrow-Pour, D.B.A.,

Mehdi, 2018-09-21 Recent innovations and new technologies in education have altered the way teachers approach instruction and learning and can provide countless advantages. The pedagogical value of specific technology tools and the cumulative effects of technology exposure on student learning over time are two areas that need to be explored to better determine the improvements needed in the modern classroom. *Advanced Methodologies and Technologies in Modern Education Delivery* provides emerging research on educational models in the continually improving classroom. While highlighting the challenges facing modern in-service and pre-service teachers when educating students, readers will learn information on new methods in curriculum development, instructional design, and learning assessments to implement within their classrooms. This book is a vital resource for pre-service and in-service teachers, teacher education professionals, higher education administrative professionals, and researchers interested in new curriculum development. Nijay K. Gupta, 2020-01-01 What if you had a guidebook that you could turn to at each stage of your academic journey to help you navigate through the process of getting a PhD in Biblical Studies and succeeding in the academic world? This book is precisely intended to fill that need. From theory to practice, you will find discussions and answers to the most pertinent and pressing questions that prospective and current doctoral students are faced with: How do I choose a program? How can I gain admission into an elite program? How do I choose a research topic? Alongside the big questions about the process, there are also a host of smaller matters: How do I publish an article? What conferences are out there in my field? Where do I start looking for a job? How do I get teaching experience? How do I write a syllabus? This guidebook tackles all of these questions and many more in three parts: *Prepare* focuses on getting into a PhD program; *Succeed* guides you through the doctoral program, especially the writing of the dissertation; and *Advance* treats issues that relate to success in the academic world, such as conference participation, publishing, employment, and best practices in teaching. *Science and Technology in Homeric Epics*

S. A. Paipetis, 2008-10-20 In the Homeric Epics, important references to specific autonomous systems and mechanisms of very advanced technology, such as automata and artificial intelligence, as well as to almost modern methods of design and production, are included. Even if those features of Homeric science were just poetic concepts, which on many occasions do not explain the astonishing details of design and manufacture like the ones included in the present volume, they seem to prove that these achievements were well within human capability. In addition, the substantial development of machine theory during the early post-Homeric age shows that the Homeric descriptions were a kind of prophetic conception of these machines, and scientific research must be a quest for the fundamental principles of knowledge available during the Late Bronze Age and the dawn of the Iron Age. Such investigations must, of necessity, be strongly interdisciplinary and also proceed continuously in time, since as science progresses, new elements of knowledge are discovered in the Homeric Epics, amenable

to scientific analysis This book brings together papers presented at the international symposium Science and Technology in Homeric Epics which took place at Ancient Olympia in 2006 It includes a total of 41 contributions mostly original research papers covering diverse fields of science and technology in the modern sense of these words *Innovations and Technologies for Soft Skill Development and Learning* Nagarajan, Suresh Kumar,R., Mohanasundaram,2020-04-10
