Abe and Bev both look in a plane mirror directly in front of Abe (left, top view). Abe can see himself while Bev cannot see herself—but can Abe see Bev, and can Bev see Abe? To find the answer we construct their artificial locations “through” the mirror, the same distance behind as Abe and Bev are in front (right, top view). If straight-line connections intersect the mirror, as at point C, then each sees the other. The mouse, for example, cannot see or be seen by Abe and Bev.

Here we have eight students in front of a small plane mirror. Their positions are shown in the diagram below. Make appropriate straight-line constructions to answer the following:

- |  |   |
|--|---|
| Who can Abe see? <u>Eva, Flo, Guy, Han</u> | Who can Abe not see? <u>Abe—Don</u>       |
| Who can Bev see? <u>Don—Han</u>            | Who can Bev not see? <u>Abe—Cis</u>       |
| Who can Cis see? <u>Cis—Han</u>            | Who can Cis not see? <u>Abe, Bev</u>      |
| Who can Don see? <u>Bev—Guy</u>            | Who can Don not see? <u>Abe, Han</u>      |
| Who can Eva see? <u>Abe—Flo</u>            | Who can Eva not see? <u>Guy, Han</u>      |
| Who can Flo see? <u>Abe—Eva</u>            | Who can Flo not see? <u>Flo, Guy, Han</u> |

Writing on the Wall Philip Van Notten, 2005 Although the significance of 9 11 is subject to debate it is symbolic of a general sentiment of discontinuity whereby society is vulnerable to undefined and highly disruptive events Recent catalysts of this sentiment are eye catching developments such as the SARS Severe Acute Respiratory Syndrome and bird flu outbreaks the Enron and Parmalat scandals political assassinations in Sweden and the Netherlands regime changes in Iraq and Afghanistan and terrorist attacks in Bali Istanbul Madrid and various parts of the Middle East However recent discontinuities should not be seen as evidence that discontinuities occur more frequently now than they did before Looking back in history we see that disruptive processes are common For example 25 years ago few Europeans would have predicted the upcoming upheavals on their own continent the collapse of communism Berlin as the capital of a reunited Germany the wars in the former Yugoslavia the single European currency and the near doubling of the number of European Union member states Changes elsewhere have been no less discontinuous and unforeseen the fall of the Asian tigers the emergence of the Internet and mobile telecommunication and the presidency of Nelson Mandela Societal discontinuity is a relatively new area of concern in policy development Since the 1970s the consideration of change and discontinuity has gained some ground over predictive forecasting which tended to reason from continuous developments and linear processes Rather than making forecasting the future it has become popular to use scenarios as a manner to consider several possible futures Scenarios are coherent descriptions of alternative hypothetical futures that reflect different perspectives on past present and future developments which can serve as a basis for action Scenario development aims to combine analytical knowledge with creative thinking in an effort to capture a wide range of possible future developments in a limited number of outlooks Scenario development assumes that the future is uncertain and the directions in which current developments might range from the conventional to the revolutionary In theory scenario development is a way to consider future discontinuity However there are indications that the theoretical promise is not reflected in scenario practice Research has shown that scenarios do not consider the idea of discontinuity as a matter of course In our research we found that a scenario study would benefit from efforts to create and foster a culture of curiosity for exploring the future and the possible discontinuities rather than simply commissioning a scenario study to provide insights about the future Only then can one read the writing on the wall of future developments

**The Master's Degree in Education as Teacher Professional Development** Gary Galluzzo, Joan P. Isenberg, Stephen C. White, Rebecca K. Fox, 2012-03-16 Teacher education is under more scrutiny than ever as standards based education is becoming more and more the norm Although much literature is available that addresses developing teacher education no one addresses how to create and develop a master s level program Gary R Galluzzo Joan Packer Isenberg C Stephen White and Rebecca K Fox professors at the highly regarded Graduate School of Education at George Mason University present a text to help deans and other professionals develop a master s level degree program that

meets the standards of the National Board for Professional Teaching Standards The various sections explain in depth the facets of the program s design including how to qualify future students answering the call by the National Board provide researched evidence around Advanced Studies in Teaching and Learning and lastly explore what will become the new standards of accountability for teacher education Using their own experience as they reconceived their own program for a master s degree for practicing teachers the authors provide first hand accounts of their own expectations outcomes and continual dilemmas to inspire more discussion how teacher education can improve the quality of teaching in America s schools
