Discourse Development S. A. Kuczaj, 2012-12-06 For some time now the study of cognitive development has been far and away the most active discipline within developmental psychology Although there would be much disagreement as to the exact proportion of papers published in developmental journals that could be considered cognitive 50% seems like a conservative estimate Hence a series of scholarly books devoted to work in cognitive development is especially appropriate at this time The Springer Series in Cognitive Development contains two basic types of books namely edited collections of original chapters by several authors and original volumes written by one author or a small group of authors The flagship for the Springer Series is a serial publication of the advances type carrying the subtitle Progress in Cognitive Development Research Each volume in the Progress sequence is strongly thematic in that it is limited to some well defined domain of cognitive developmental research e g logical and mathematical development development of learning All Progress volumes will be edited collections Editors of such collections upon consultation with the Series Editor may elect to have their books published either as contributions to the Progress sequence or as separate volumes All books written by one author or a small group of authors are being published as separate volumes within the series **Merrill-Palmer Quarterly**, 1986 English for Daily Use Edna Louise Sterling, 1929 **New English Dramatists** Elliott Martin Browne, Alan Brien, Harold Hobson, Jack Walter Lambert, Simon Trussler, Alan Pryce-Jones, 1967 *Early Modern Catholicism* Robert S. Print Culture in Southern Africa Caroline Davis, Archie Dick, Elizabeth le Roux, Dennis Walder, 2021-07-29 Print Culture in Southern Africa is concerned with the institutions and processes informing textual production circulation and consumption in the region over a broad historical period from the late 18th century to the present day The book is organised around three closely related themes Firstly it presents original research into the formation of reading publics and the impact of reading cultures by uncovering obscure but important reading communities and circuits of book distribution and reception A second theme is the relationship between print and politics with a particular focus on the networks of power how control over the production and circulation of printed books has shaped literary and cultural development The third theme is transnational print culture and how the control exercised by publishers in Europe and America has shaped literature and society in southern Africa Drawing together interdisciplinary research and diverse methodologies the collection encompasses a range of perspectives including literary studies anthropology publishing studies the history of the book and art history and many of the chapters are based on previously unexamined archives and collections The volume contributes to current debates and opens up new and exciting ways of furthering the study of postcolonial literature and African book history The chapters included in this book were originally published in the *Journal of Southern African Studies* The Literary Digest, 1916
