Document Purpose

This document has been written for Oracle Acme Packet Session Border Controller (SBC) Administrators. This document provides instructions for configuring the SBC to generate local CDR files. It also describes how to configure the SBC to push local CDR files to a remote SFTP server using the sftp protocol.

This document provides an example SBC configuration created by TransNexus technical support. TransNexus recommends that users contact Oracle Acme Packet technical support directly for help with any SBC configuration questions. Download instructions for [Configuring SBC Local CDRs SFTP](#).
