plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book
