The Mathematics Lesson-Planning Handbook, Grades 3-5 Ruth Harbin Miles, Beth McCord Kobett, Lois A.

Williams, 2018-07-13 This book brings together the best of Visible Learning and the teaching of mathematics. The chapters on learning intentions, success criteria, misconceptions, formative evaluation, and knowing thy impact are stunning. Rich in exemplars grounded in research about practice and with the right balance about the surface and deep learning in math, it is a great go-to book for all who teach mathematics. John Hattie, Laureate Professor, Deputy Dean of MGSE, Director of the Melbourne Education Research Institute, Melbourne Graduate School of Education. YOU are the architect in the mathematics classroom. When it comes to mathematics lessons, do you sometimes feel overly beholden to the required texts from which you teach? Do you wish you could break the mold but feel like you get conflicting guidance on the right things to do? How often do you find yourself in the last minute online scramble for a great task activity that will capture your students' interest and align to your state standards? In *The Mathematics Lesson Planning Handbook, Grades 3-5: Your Blueprint for Building Cohesive Lessons*, you will learn the streamlined decision-making processes that will help you plan the focused, research-based standards-aligned lessons your students need. This daily reference offers practical guidance for when and how to pull together mathematics routines, resources, and effective teaching techniques into a coherent and manageable set of lesson plans. This resource will lead teachers through a process of lesson planning based on various learning objectives. Set the stage for lesson planning using relatable vignettes. Offer sample lesson plans for Grades 3-5. Create opportunities to reflect on each component of a mathematics lesson. Suggest next steps for building a unit from the lessons. Provide teachers the space and tools to create their own lesson plans going forward. Based on years of classroom experience from seasoned mathematics educators, this book brings together the just-in-time resources and practical advice you need to make lesson planning simple, practical, and doable. From laying a solid foundation to choosing the right materials, you will feel confident structuring lessons that lead to high student achievement.

Joyce Keeling, 2017-04-17 This helpful resource provides all new, tested, standard-based lessons accompanied by reproducible handouts and easy-to-follow directions. A new book by Joyce Keeling, an elementary librarian and teacher with more than two decades experience, *Standards-Based Lesson Plans for the Busy Elementary School Librarian* presents many integrated lesson plans for students in each of the elementary grades, kindergarten through 5th grade. All lessons have been tested and refined in a school setting and they are specifically written to match the AASL Information Literacy Standards, the McREL Compendium of Standards and Benchmarks, and the Common Core State Standards. In addition to the reproducible lesson plan worksheets, the book offers in-depth discussion of how best to collaborate to teach information literacy within the scope of common elementary school curricula.
