

## Week 10: 10 questions

### Answers:

10. What does "control" mean? What does "control" mean?

Control means to regulate or direct. In the context of a business, it refers to the process of monitoring and controlling the organization's resources and activities to ensure that they are used effectively and efficiently to achieve the organization's goals.

11. Management Information Systems (MIS) provide information to the organization. What are the main functions of MIS?

MIS provides information to the organization in a way that is useful for decision-making. The main functions of MIS are:

1. Data Collection: MIS collects data from various sources, such as sales, production, and financial records.

2. Data Processing: MIS processes the collected data into a format that is easy to understand and use.

3. Data Distribution: MIS distributes the processed data to the appropriate departments and individuals.

4. Decision Support: MIS provides decision-makers with the information they need to make informed decisions. This is done through reports, dashboards, and other tools.

12. What is the difference between a control system and a control loop? Give an example of each.

A control system is a process that regulates the behavior of another system. A control loop is a specific type of control system that uses feedback to regulate the behavior of a system.

Example of a control system: A thermostat.

Example of a control loop: A car's cruise control system. The system uses a sensor to measure the car's speed and compares it to the set speed. If the car is going slower than the set speed, the system increases the throttle. If the car is going faster than the set speed, the system decreases the throttle. This process continues until the car is traveling at the set speed.

## 1984 2 Chapter 8 Questions And Answers:

**Private Foundations** Bruce R. Hopkins, Jody Blazek, 2004-03-01 Private foundations are a special niche of the nonprofit sector. They are allowed to remain relatively tax exempt in exchange for supporting charitable activities. There are more than 50,000 and growing private foundations in the United States holding assets worth more than 230 billion. Private foundations are subject to a unique and complex set of mostly tax regulations that govern everything from how much money they give away to their investment policies and procedures. This much needed annually updated manual explicates a wide range of tax rules and regulations for these foundations and prepares them for the increasing scrutiny of the IRS. Co-authored by a lawyer and tax accountant, the revised and expanded second edition of this highly respected guide includes practical tax compliance suggestions and in depth legal explanations, line by line instructions, sample filled IRS forms and complete citations. *A System of Rights* Rex Martin, 1993 The justification of political authority is one of the long standing issues of political philosophy and one which persistently defies satisfactory solution. This book sets out to provide an original justification by establishing a background framework for dealing with this problem. The model political system that emerges is one in which certain kinds of political rights are emphasized. Rex Martin then discusses what the implications of such a system might be for democratic institutions, political allegiance, punishment and ultimately for the nature of political authority itself. Poetry and Narrative in Performance Douglas Oliver, 1989-06-18 This text uses machine data of poetry readings to discover features of rhythm and intonation and to clear away methodological problems that hamper the teaching of poetic melody. The discussion is linked to the theory of literary form, throwing light on the role of emotion in poetry and fiction. *Answering for Crime* R. A. Duff, 2007-11-16 In this long awaited book Antony Duff offers a new perspective on the structures of criminal law and criminal liability. His starting point is a distinction between responsibility understood as answerability and liability and a conception of responsibility as relational and practice based. This focus on responsibility as a matter of being answerable to those who have the standing to call one to account throws new light on a range of questions in criminal law theory, on the question of criminalisation which can now be cast as the question of what we should have to answer for and to whom under the threat of criminal conviction and punishment, on questions about the criminal trial as a process through which defendants are called to answer and about the conditions, bars to trial given which a trial would be illegitimate, on questions about the structure of offences, the distinction between offences and defences and the phenomena of strict liability and strict responsibility and on questions about the structures of criminal defences. The net result is not a theory of criminal law but it is an account of the structure of criminal law as an institution through which a liberal polity defines a realm of public wrongdoing and calls those who perpetrate or are accused of perpetrating such wrongs to account. Analog Electronics Malcolm E. Goodge, 1990 **Designing Effective Instruction** Gary R. Morrison, Steven M. Ross, Jerrold E.
