

# Oracle Berkeley DB Java Edition

## KEY BUSINESS BENEFITS

- Very high performance
- Simple, direct, indexed storage
- Local, in-process storage
- High concurrency
- Massive scalability
- Transactional data integrity
- Automatic recovery
- Zero administration
- Fast, simple development
- Flexible deployment

Oracle Berkeley DB Java Edition is a high performance, transactional database in pure Java. Using Berkeley DB Java Edition you can persist objects using the Java Collections API, as annotated graphs or as Key/Value pairs in a fast, local database. Oracle Berkeley DB Java Edition is an easy-to-use, scalable and efficient pure Java database. Oracle Berkeley DB Java Edition is widely used in a variety of industries and within products.

## Persistence

Oracle Berkeley DB Java Edition provides all the features of an object-to-relational mapping solution and a transactional database without the overhead. Most, if not all, Java applications need to store some amount of object data. Sometimes that data must be accessible by other software infrastructure. In these cases simply map the object data into SQL using an ORM such as EJB and let the relational database process and persist the information. Other times this design pattern (Java – ORM – RDBMS) is used when the advantage of an intermediary format and the analytical power of a query language is never realized. If you do not need the flexibility of SQL processing, why use an Enterprise Java Beans (EJB) ? Oracle Berkeley DB Java Edition accomplishes the goal of transactional Java object storage without translating objects into SQL thus dramatically improving your application's performance without sacrificing any functionality.

Oracle Berkeley DB Java Edition stores and optimizes access to your Java objects, it provides concurrent transactional data storage, and data is indexed for fast retrieval just as you would expect from any database. The difference is that it does all this in a small, efficient, and easy to- manage embeddable library.

# Berkeley Database Java Edition Entity
