

The following will help you to install SST PCI adapters and fanout cables. Should you require further assistance, please contact Avocent Technical Support.

Overview

SST-4P and SST-8P PCI adapters are intelligent, high-speed (up to 528k bps on each port) PCI expansion boards, which provide high performance serial I/O solutions for a PCI bus host computer. All port interfaces are standard RS-232, with full modem control and voltage surge protection on every pin.

SST PCI adapters appear to the system host processor as memory. That is, they are memory mapped devices. Each adapter is automatically mapped into system memory at the time of device driver installation.

SST adapters occupy a PCI slot in the host computer and provide the intelligent functions to "off-load" the CPU from serial communications processing tasks.

1 Hardware Installation

Use the following procedure to install your SST PCI adapter. As an alternative, you may follow the installation instructions presented in your host computer documentation.

Quick Installation Guide

SST PCI Adapters

SST-4P and SST-8P Multiport Serial PCI Adapters

To install SST PCI adapters and fanout cables

- a) Set the host computer system power switch to OFF.
- b) Locate a free PCI expansion slot.
- c) Insert and secure the adapter firmly into the expansion slot.
- d) Replace the power card and turn the host computer ON.

2 Software Installation

Refer to the appropriate software documentation, located on your SuperSerial CD-ROM, for detailed device driver information.

3 SST Fanout Cables

SST-4 and SST-8 PCI adapters require a fanout cable (ordered separately). SST Fanout Cables (FOCs) provide four or eight RS-232 interfaces. The following diagrams illustrate pinouts and signals for DB-9, DB-25 and RJ-45 fanout cables.
