

# Protein Structure

What are the levels of protein structure and what role do functional groups play?

## Why?

Proteins accomplish many cellular tasks such as facilitating chemical reactions, providing structure, and carrying information from one cell to another. How a protein chain coils up and folds determines its three-dimensional shape. Its shape will, in turn, determine how it interacts with other molecules and thus performs its function in the cell.

## Model 1 – Formation of a Peptide Bond

1. Examine the amino acids in Model 1.
  - a. Circle an amine group in the diagram.
  - b. Draw a triangle around a carboxylic acid (carboxyl) group.
2. How are the amino acids similar to one another?

The amino acids all have a N-C-C backbone and an amino and carboxyl group.

3. How are the amino acids different from one another?

Their R-groups are different from one another.

s chemistry and biology to improve the quality of life for mankind Immediately goals of this area of research include identification of the life supporting functions of proteins and the fundamental forces that facilitate these functions Upon reaching these goals we shall have the understanding to direct and the tools required to implement changes that will dramatically improve the quality of life For example under standing the chemical mechanism of diseases will facilitate development of new therapeutic drugs Likewise understanding of chemical mechanisms of plant growth will be used with biotechnology to improve food production under adverse climatic conditions The challenge to understand details of protein structure function relationships is enormous and requires an international effort for success To direct the chemistry and biology of our environment in a positive sense will require efforts from bright imaginative scientists located throughout the world Although the emergence of FAX e mail and the World Wide Web has revolutionized international communication there remains a need for scientists located in distant parts of the world to occasionally meet face to face
